Stockholm – Schweden

24. Internationales Tourenyachten-Treffen

Stockholm in summer - Yes, I love it!

We followed the invitation of our Swedish friends. There was two big birthday to celebrate in Stockholm, **KSSS** 175 years and **KMK** 90 years.

We were again several small groups on the way. Some thru **Götakanal**, some via **Bornholm** and **Swedish south coast** and some via the **Baltic-states**, all in right time in **Högböte** and **Saltsjöbaden**.

The main part of our international sail- and motor yacht flotilla bounded into Högböte, the club island of KMK where there was a nice barbeque evening for the participants. In next day there was 25M a cruise back to Saltsjöbaden.

In KSSS club harbour our crews had an extraordinary program. The official reception by the vice mayor took place in the **City hall of Stockholm** with snacks. As one of the many highlights she followed exactly the demanding middle ages mayor protocol in the sleeveless summer outfit. In the totally cold mosaic covered gala hall was able to host 2300 **Nobel price** visitors for dinner.

We cannot forget **WASA museum** as a part of our interesting city survey. The boat trip to **Drottningholm Castle**, the throne of the royal family, was an exceptional speciality.

Empfang im Stockholmer Rathaus

Panorama Stockholm

White cruising boats on the way – perhaps to Saltkrokan?

The steam ship from the lake **Mälaren** in the most wonderful sunshine created us an illusion to be actors in the film of **Inga Lindström**. The buffet with Swedish west coast salad was delicious and everybody hoped that the trip would last one whole day.

The gala evening in Saltsjöbaden **Grand Hotel** was a distinguished ending for the event in historic circumstances. Next morning, as farewell, **Magnus Anderberg** served us fresh bread, champagne and even some Gammeldansk, if somebody so desired. Then we started sailing home in small groups, a little longing but still gladly looking forward to next coming event.
